Create customizable business driven data

ABOUT TTI

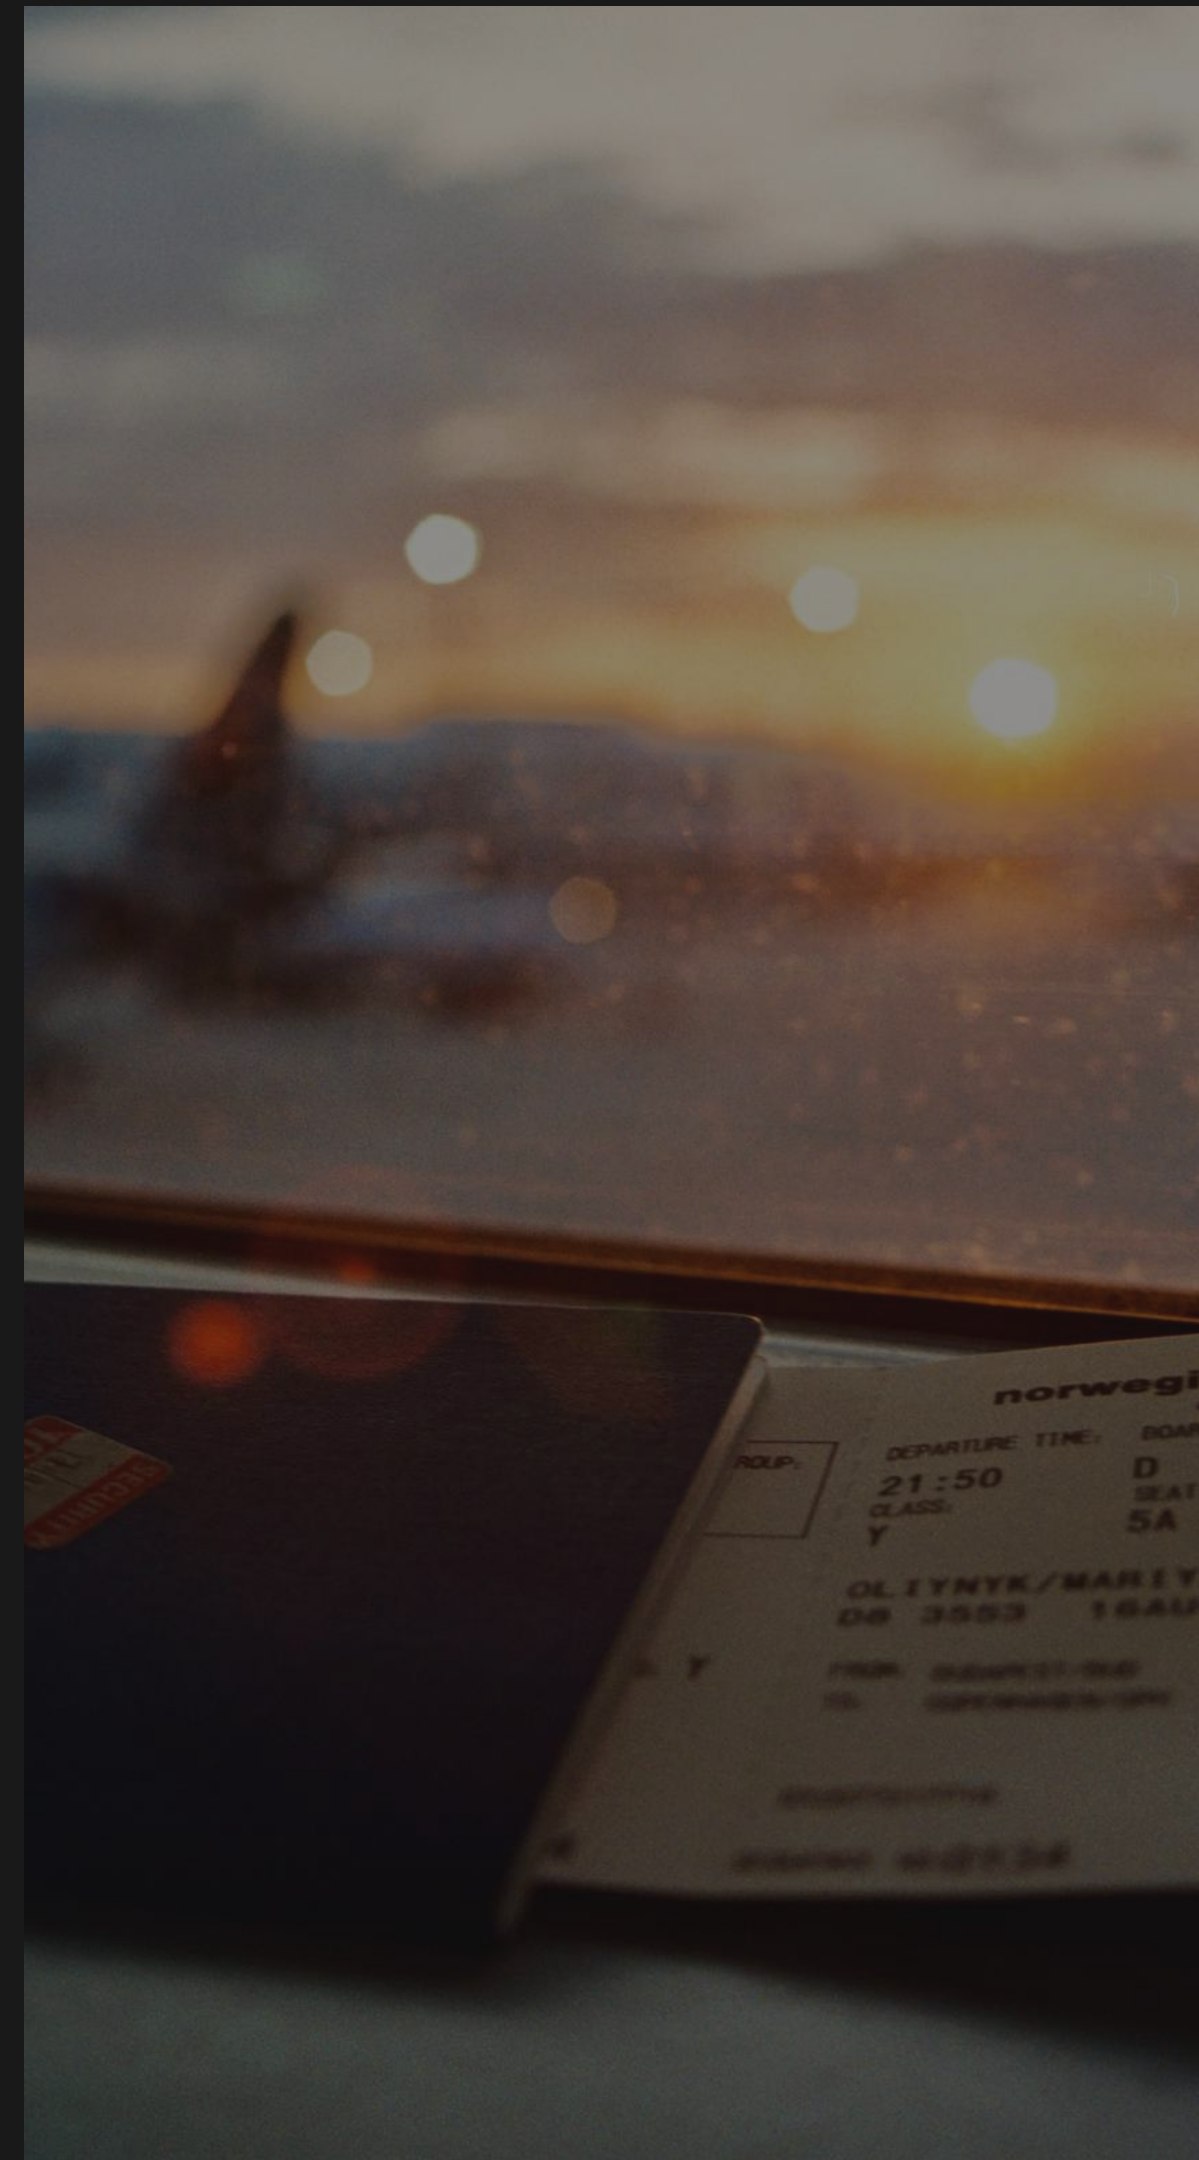

Evolution must be simple

Since 2004, Travel Technology Interactive (TTI) has been providing air carriers with innovative Airline IT solutions with our next-generation Zenith® Passenger Reservation System (PSS) and Nexlog® Cargo Management Solution (CMS).

An IATA preferred partner for passenger and cargo airlines since 2006, TTI has been providing leading solutions to our customers in Europe, Africa, Asia, Pacific, Middle East and the Americas for 20 years.

With a business approach that is based on a partnership model, our philosophy and development processes are highly customer-oriented.

This is because at TTI, we believe that evolution begins with the customer.
